WEDDING & EVENT LIVESTREAMING

[huntproductions.com.au](http://huntproductions.com.au)

## Why livestream?

When distance, capacity, or availability get in the way, livestreaming provides an **achievable and affordable** way for you to include friends and family in your event as though they are in the room with you. You'll also be able to **instantly replay** the moment forever on your own link as soon as we go live.

Whether you want to **include friends or family** who can't make it, **increase your virtual guest list**, or simply enjoy that **full replay** and **professional edit** for years to come - speak to us. We've conducted over 600 livestreams and are now available to work with you on your wedding day or event.

# Our Process

## STEP 1 / FILL OUT THE FORM

We'll get more information from you to get the conversation started and arrange a time to discuss more.

## STEP 1 / QUOTE & CALL

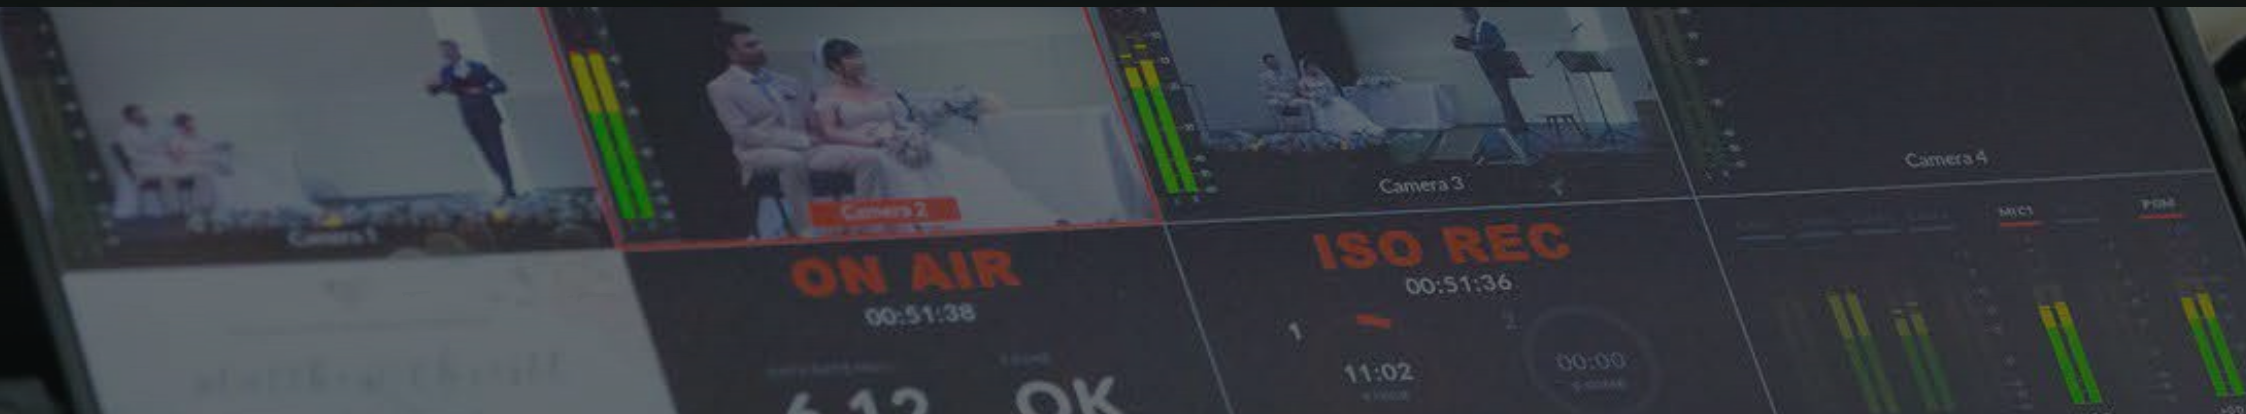

We'll supply a preliminary quote and book a time to meet via Zoom to get to know each other and finalise the details.

## STEP 3 / BOOKING & PREP

With your day booked, we will prep what you need, including link set up, images, understanding the order of the day, and other assistance needed.

## STEP 4 / THE DAY & AFTER

Your wedding will be captured, shareable, and available instantly for replay. If you've opted for a full ceremony edit, we will deliver it to you via your gallery link within two weeks.

# Top FAQs

**Can you livestream from a location that doesn't have internet or power?**

Yes, we use bonded internet and portable power to ensure reliability wherever you have your ceremony.

**Will you provide a link that we can send to our guests before the wedding?**

Yes, we assist you in setting up your own channel or streaming destination or we can use ours. We'll provide a link with your graphic images ready to share to an unlimited number of virtual guests long before the day - all they need is access to the internet. You can choose to make it a public or private link and whether you allow comments.

**Should we meet?**

Yes, we'll set a Zoom meeting to learn more about you, the venue, and your needs. We recommend connecting us directly with your venue contact so we can plan with them. We also require access to the venue 3 hours prior to the ceremony commencing.

**Do we still need a photographer or videographer?**

We'll provide you with a professional, full ceremony live online experience and recording but we aren't photographers or videographers. Ask us who we recommend.

**Will we get a copy of the recording?**

Yes, we stream in High Definition (1080p) which will remain available to you in perpetuity at the original link, and we will provide you with an offline copy of the original recording. Additionally, you can add a professional 4k edit to your package.

**Can you also take care of the audio for us?**

Yes, we can provide full audio services, including equipment hire and live audio mixing for your videos, music, celebrant/speakers, and live musicians. We will bring all of the audio from the physical ceremony into the online livestream experience.

We know this hasn't answered everything. **Contact us** to book an obligation-free consultation.

# Standard Packages

We'll cater a package to suit your needs when you contact us for a customised quote.
